

## **The Hampshire Gundog Society Premier Open Show Saturday 4<sup>th</sup> May 2024**

### **Lagotto Romagnolo.**

Thank you all for a lovely entry.

#### **P (6 2)**

1. Whitworth's Mad Max Madiba 9mo dog Excellent coat well balanced with good body leg proportions. Moved well for a puppy particularly in profile. Good shaped head and eye colour. Chest of correct depth but not too broad in front and with good width behind the elbows. A smart dog but without losing his rustic appearance. BP
2. Jone's Artemida Della Regina Gea 8mo old bitch. Quite a well grown body for her age but it takes time for everything to settle and she is certainly a robust type. Lovely head and expression and could just see her good eyes. Excellent coat type. Well proportioned hind quarter although maybe needing a touch more length to lower thigh and length of front leg which hopefully will sort itself out as she matures. Moved ok but can stand a bit close in front at the moment.
3. Deblasi's Mianatra Ever So Elegant

#### **Open (6 4)**

1. **Ferguson's Truffalusa November Moon from Mizani.** An excellent example of a male dog of this breed. Correctly proportioned body with correct outline and well balanced all through. Excellent coat type. Very good typical head and attentive intelligent expression. Correct body and rib cage. Correct amount of sloop to the croup. Nice bone and pasterns and moved very well. BOB
2. **Lillicrap's Mizani Sebjo Iola** another lovely example of the breed and a very similar type to 1. but a bitch instead. In fact, they turned out to be half brother and sister having the same mother. Although not in her best jacket today I could see she had an excellent coat, lovely head and expression with a reverse scissor bite. Kind intelligent eye, well proportioned and balanced body and moved well. RBOB
